skn1999.github.io/sumit-portfolio

Product Designer with experience building SaaS products across engineering and UX. After shipping production software, I pursued a double Master's in Human-Computer Interaction to build my expertise in user-centred design, research, and product thinking. I combine systems thinking, user research, and usability testing to design user-friendly products that simplify complex problems.

EDUCATION

Double-degree M.Sc. Human-Computer Interaction & Design

2024-2026

Aalto University, Finland | University of Trento, Italy

- Core Focus: User-Centered Design, Interface Engineering, User Interface Construction, Usability Testing.
- Cognitive Sciences: Social Cognition, Decision-making, Digital Nudging, Participatory Design, Affective Computing

EXPERIENCE

UX & Accessibility Designer @ Groundwork

June 2025 – Present

Remote

- Led **end-to-end product design** for an early-stage consultancy, defining service offerings, workshops, and facilitation methods for regulated digital products.
- Defined design and facilitation exercises, co-designed **workshops with disabled community**, translating accessibility requirements into practical design guidelines.
- Led **value-proposition validation** and secured **2nd place at the EIT Jumpstarter (New European Bauhaus)**, strengthening the venture's funding readiness.

Product Design Intern @ Dedanext S.p.a (EDIAQI EU-Horizon Collaboration)

Mar 2026 – May 2026

Trento, Italy

- Conducted qualitative research to understand user mental models, converting complex environmental data into information architectures for a multi-stakeholder platform.
- Evaluated **6 interactive display concepts** across **4 data modalities** with **200 participants**, defining layout density guidelines that improved ambient data comprehension speed by **~30%**.
- Developed a reusable design framework for ambient digital displays to build consistent and scalable interface design.

Design Engineer (Core Systems) @ Optmyzr Inc.

May 2020 – July 2024

Hyderabad, India

- Redesigned the onboarding experience by creating a 5-step configuration wizard, **reducing onboarding drop-offs by ~25%** and improving setup during periods of high backend load.
- Co-developed a design system **comprising 30+ reusable React components**, standardising UI patterns across multiple SaaS products and improving feature development time.
- Redesigned high-density data interfaces to improve readability and navigation, enabling users to quickly analyse dense ad metrics for multiple accounts.

PROJECTS

EDIAQI – In-room Ambient Display

[Display Prototype](#)

Designed and developed an ambient display that converts complex indoor air quality data into actionable insights for non-expert occupants.

Renovation Insights ("Remonttihintojen tutkija")

[Live Prototype](#)

Designed and built a localised web application that transforms complex home renovation cost data into interactive visualisations, helping Finnish homeowners make informed financial decisions.

TECHNICAL SKILLS

Design: Product Design, User Research, Interaction Design, Information Architecture, Accessibility (WCAG), Prototyping

Research & Strategy: Usability Testing, Facilitation, Design Thinking, Systems Thinking, Participatory Design

Technical Stack: Figma, React, TypeScript, Next.js, Node.js, Design Tokens, Git, AI-Augmented Workflows
