

Sumit Nayyar

DESIGN ENGINEER · AI-NATIVE BUILDER

Helsinki, Finland | +358 41 743 4861 | sknayyar.sk@gmail.com | [Portfolio](#) | [LinkedIn](#) | [Writing](#)

Designer-engineer who designs in Figma and ships in React/TypeScript, with no handoff gap between "looks great" and "works great." 4+ years building and launching production SaaS end-to-end. AI is native to how I build: I go from idea to working prototype in hours with Lovable, Cursor, and Claude/GPT, then bring craft and engineering to make it consistently great. Strong at turning complex data and messy workflows into clear, human product experiences. Based in Helsinki with valid work rights.

SELECTED PROJECTS

Joyful Gifting Prototype

LOVABLE

AI experiment

- Personalized digital gift/greeting-card flow with template browsing, occasion selection, and recipient personalization, taken from idea to live product.
- AI for speed to first draft; taste, flow, and polish to make it shippable. giving-joy-glow.lovable.app

Renovation Insights

LOVABLE

AI experiment

- "Remonttihintojen tutkija", a Finnish-language tool that makes researching renovation costs, a high-stakes opaque decision, feel clear and approachable.
- Same approach: AI to prototype fast, design judgment for what to keep. urakka-hinturi-fi.lovable.app

EDIAQI Tablet Prototype

EU HORIZON

Service design + front-end

- Translated 12+ live indoor-air-quality sensor metrics into clear, actionable insight for non-technical school and facility staff, then built the front-end to deliver it.
- Designed a 2-touchpoint architecture for decision-making and reporting across multiple stakeholder groups; accessibility considered from the start. [View prototype](#)

EXPERIENCE

Design Engineer (Intern → SDE-II) · Optmyzr Inc

May 2020 to Jul 2024

Designed and shipped product features end-to-end on a PPC platform used by agencies worldwide, from REST API to React UI to deployment.

- Developed an Insights feature end-to-end that increased platform revenue by **25%**.
- Architected a Benchmarking Tool (React + REST APIs) that lifted user signups by **10%**.
- Built data-integration features and workflows that boosted engagement by **13%**.
- Led migration to a shared React component library (4-person team), setting coding standards and mentoring juniors. Design systems and reusable patterns.
- Rebuilt the marketing site: **+20%** organic reach via performance/SEO; instrumented analytics with heatmaps and behavioral data.

Developer & Service Designer · Dedagroup S.p.A. (DedaNext)

Mar 2026 to May 2026

A developer who designs, bridging engineering and UX on the EDIAQI project under the EU Horizon Cluster.

- Turned 12+ live sensor metrics into comprehensible insight via data viz and interface design, then built the front-end.
- Led research synthesis, stakeholder mapping, and journey analysis to ground build decisions in real user needs.

- Delivered production-ready front-end from high-fidelity Figma in close collaboration with dev teams.
- Redesigned and rebuilt marketing sites; implemented CloudCannon CMS; optimized performance and SEO.

SKILLS

AI build	Lovable, Cursor, Claude, GPT, Gemini (prototype-to-ship)
Design	Figma, UX research, journey mapping, data visualization, design systems, accessibility
Frontend	React, Next.js, TypeScript, JavaScript (ES6+), HTML/CSS
Backend	Node.js, C#, PHP, Python, REST API design
Cloud/Ops	AWS, GCP (familiar), Git & CI/CD, Agile/Scrum

EDUCATION & LANGUAGES

MSc, Human-Computer Interaction

Aalto University, Espoo, Finland · Aug 2024 to Jul 2025

MSc, HCI, Cognitive Science

Università di Trento, Italy · 2022 to 2024

Languages English (full professional) · Finnish (learning in progress)
