Core Skills

Service Design	Service Blueprints	Customer Journey Mapping	Service Flows	Stakeholder Mapping
UX & Discovery	User Interviews	Workshop Facilitation	Quantitative/Qualitative Analysis	Usability Testing
Product Design	Interaction Design	Wireframing	High-Fidelity Prototyping	Responsive UI
Technical Knowledge	Accessibility (WCAG)	Design Systems	Design Systems	

Professional Summary

- Mar 2026 - Current Trento, Italy
 Service Designer
Dedagroup S.P.A.
 - Leading **research synthesis and service design** framing for an IAQ innovation project under EU Horizon Cluster, including stakeholder mapping, journey analysis, and the definition of value propositions, activities, and channels for a non-profit model.
 - Designed a 2-touchpoint architecture to support decision-making and reporting for different stakeholders.
 - Currently working on my thesis on how to translate 12+ IAQ metrics into a actionable and comprehensible insights for non-advanced users.
- Jun 2021 - Jul 2024 India
 Full-stack Designer and Developer
Optmyzr Inc.
 - Led discovery and UI design for multiple features, transforming user needs and product goals into scalable interface solutions.
 - Conducted UX research and **user studies with 50+ participants** to identify pain points and improve the Data Integrations experience, resulting in +13% engagement.
 - Collaborated with product and engineering teams to improve workflows, content modelling, and self-service publishing for non-technical users.
 - Built reusable UI patterns and component structures to support consistency, maintainability, and faster delivery across the product.
- May 2020 - Jun 2021 India
 Intern - UI Designer and Front-End Engineer
Optmyzr Inc.
 - Redesigned core marketing pages and improved UX across devices using HTML, CSS, and JavaScript, increasing organic reach by 20%.
 - Built an Insights Tool that contributed to a 25% sales increase** by improving usability and information access.
 - Used behavioural analysis and heat-map data to identify friction points and guide interface improvements.

Relevant Projects

Indoor Air Quality (IAQ) Innovation Project | Dedagroup

Leveraging User-Centred Design strategy to design and build a service to cater the needs of different stakeholders for IAQ management. Conducted qualitative and quantitative research, user journey mapping and leveraging Figma AI to quickly spin up prototypes and user test them.

[View My Process](#)

Social Integration in Chilean Housing | Research Project

Designed participatory co-design activities for shared community spaces. Mapped stakeholder needs, service interactions, and social dynamics. Developed concepts to improve community cohesion and long-term use. Outcome: strengthened design decisions through participatory research and systems thinking.
