[Portfolio](#)

UX Architect and Designer with 4 years of software engineering experience. I turn complicated, data-heavy systems and messy workflows into clean, simple software layouts. Looking for a full-time UX Architect or Product Designer role.

EDUCATION

Double-degree M.Sc. Human-Computer Interaction & Design

2024-2026

Aalto University, Finland | University of Trento, Italy

- Core Focus: User-Centered Design, Interface Engineering, User Interface Construction, Usability Testing.
- Cognitive Sciences: Social Cognition, Decision-making, Digital Nudging, Participatory Design, Affective Computing

EXPERIENCE

Design Engineer @ Groundwork

2025 – Present

Remote

Led design and strategy for an early-stage consultancy focused on accessibility in regulated digital products. Defined end to end design and facilitation model, co-designed tools and workshops aimed at disabled participants, translated regulatory and accessibility requirements into actionable product practice. Led validation and funding success, including 2nd place award at EIT Jumpstarter (New European Bauhaus)

Service Design Intern @ Dedanext S.p.a

Mar 2026 – May 2026

Trento, Italy

Conducted open card-sorting and category ranking studies to map user mental models, organizing messy environmental information for a multi-stakeholder platform. Built and tested interface prototypes across 6 real-world interactive scenarios and 4 data modalities to precisely measure human comprehension speed. Created design framework to standardize layout density guidelines for ambient and glanceable digital displays.

Frontend Engineer (Core Systems) @ Optmyzr Inc.

May 2020 – July 2024

Hyderabad, India

Redesigned onboarding journey into an active 5-step configuration wizard, keeping users engaged while heavy backend data loaded and significantly dropping sign-up drop-offs. Co-authored the core Design System React & TypeScript component library, integrating components seamlessly with backend APIs across a SaaS product suite.. Optimized page layouts for high-density data views, so users could seamlessly navigate over 10,000 rows of analytical metrics without visual fatigue..

PROJECTS

EDIAQI – In-room Ambient Display

[Display Prototype](#)

Technologies: Figma, Design Tokens, Next.js

Contextual in-room ambient display developer for non-expert occupants as part of my internship. The main aim of the display is to inform the user what is happening and what action is suitable to take, if any, at any given time.

Renovation Insights ("Remonttihintojen tutkija")

[Live Prototype](#)

Technologies: Claude AI, Next.js, V0

Created a localized Finnish utility that visualizes opaque home renovation cost data, making high-stakes financial calculations easy to read and understand.

TECHNICAL SKILLS

Core Methodologies: Data Schema Design, Information Architecture, React, TypeScript, Interaction Testing, Usability Evaluation

Design Skills: Figma, Design System, Component Architecture, Prototyping, WCAG, Interaction Design

Technical Stack: React, TypeScript, JavaScript, Next.js, Node.js, Design Tokens, Git, Claude AI
