
Report: Gosta Labs

Group 4 • 09.04.2025

Overview

1. Market Strategy
2. Product Strategy
3. Product-to-market fit
4. Go-to-market strategy
5. Internal Development Strategy

Market Strategy

Market Prioritization

Country	Opportunity	Challenge
Poland	High EHR maturity, KPO funds	Unclear reimbursement, strong local competition (Parrot AI)
Czechia	Acute burnout, R&D strengths	Fragmented digitization, Lack of technical competencies
Romania	€400M government funding	Local AI startups emerging

GTM Partnerships

Short-term (0–6 mo):

- Integrate with 1–2 EHR vendors
- Initiate 2 pilots in Poland & Czechia
- Launch localized marketing assets

Mid-term (6–12 mo):

- Co-develop bundled offers with EHR partners
- Recruit & onboard partner engineers

Long-term (>12 mo):

- Launch **Partner Certification Program**
 - Expand VAR network for scale across CEE
-

Competitive Landscape

Nuance

- Strong Brand
- Low Local Adoption
- Moderate Integration Ease
- Low Brand Trust
- Moderate Price

Parrot AI / Parol

- Local Brands
 - Less Scalable Tech
 - Not ready for commercialization
 - High Brand Trust
-

Product Strategy

Gosta Labs Product Strategy

Product

- Aims to reduce physician burnout and improve care quality
- Designed for B2B2C use: sold to institutions, used by doctors

Integration & Adoption

- Full value achieved through integration with EHR systems
- Varying EHR maturity across CEE; local IT partners needed
- Doctors see benefits but may have concerns: Having to learn new tools without proper training or having to do more patients in a day with even tighter schedule

Market Offering

- Gosta Aide Core: SaaS tool, minimal setup, for less digitized markets
- Gosta Aide Integrated: With EHR integration, for mature systems
- Services Package: Onboarding, training, compliance, pilots

Go-to-Market Optimization

- Ensure GDPR-compliant hosting within EU
 - Partner with local integrators for EHR connectivity
 - Focus communication on time savings, not cost-cutting
-

Gosta Labs Product-Market Fit

Proven traction in Finland

- 11 healthcare customers, strong revenue growth
- Gosta Aide saves doctors time by automating clinical notes

Expansion to Eastern Europe

- Same core pain point validated (documentation burden)
- Product adaptable to local languages & workflows

Adaptations for new markets

- Local onboarding & EHR integration prioritized
 - Piloting flexible pricing based on early feedback
 - Iterative, feedback-driven approach to scale across Europe
-

Go-to-market strategy

Value Capturing Strategy

A three pillar approach to capturing value

Define Clear Value

Solve the acute pain of physician burnout while directly supporting the strategic national e-health goals of CEE nations.

Price for Adoption

Apply a flexible, tiered pricing model that proves ROI and is tailored to the region's economic realities and procurement processes.

Convert with precision

Execute a targeted, partner-led sales funnel designed to navigate the complex hospital Decision-Making Unit (DMU).

Pillar 1 - Value Proposition

Solving physician burnout

- **The Pain:** Directly addresses the severe administrative burden causing high rates of physician burnout (affecting 63% of doctors in Poland and 90% in Hungary).
- **The Gain:** Frees up significant clinical time, improving both staff well-being and patient capacity in under-resourced systems.

Aligning with National Strategies

- **The Goal:** Aligns with national digitalisation agendas (e., Poland's e-Health (P1) system, Hungary's EESZT).
 - **The Asset:** Generates high-quality structured data required to modernize healthcare, turning docs into a strategic asset.
-

Pillar 2 - Pricing for Adoption

1. Pilot Programme (Prove ROI)

- **Offer:** A structured, paid pilot or limited free trial.
- **Goal:** Lower entry barriers and provide concrete proof of value. This is our primary conversion tool.

2. Professional Tier

- **Offer:** The core subscription for individual departments and private clinics.

3. Enterprise Tier

- **Offer:** Volume-based licensing for large hospitals and public networks.
 - **Goal:** Align with complex public tender processes and facilitate large-scale adoption.
-

Pillar 3 - Conversion Model

Success depends on navigating a complex sales cycle with local expertise.
We will target the entire Decision-Making Unit (DMU)

- **The Clinician Champion** (Initiator)
 - **The IT/Data Gatekeeper** (Influencer)
 - **The Economic Buyer** (Decision-Maker)
-

Pillar 3 - Conversion Model

Proposed 5-Stage Funnel:

1. **Awareness:** Generate leads via industry events & partner introductions.
 2. **Consideration:** Nurture with webinars & localized ROI calculators.
 3. **Pilot:** The key conversion event to prove success metrics against local KPIs.
 4. **Procurement:** Navigate tenders with direct support from a local channel partner. This step is critical and cannot be managed from afar.
 5. **Expansion:** Use the pilot as an internal case study to drive wider adoption.
-

Financial Strategy 1/2

Revenue potential

- Subscription: 120 €/doctor/month
- Year 1: 100 doctors → 144 000 €
- Year 2: 150 doctors → 216 000 €
- Year 3: 225 doctors → 324 000 €
- Enterprise deals could boost revenue further

Costs and Potential (year 1)

Initial Setup (about 300 000 €)

- Staff: 120 000 €
 - Marketing: 50 000 €
 - Office: 80 000 €
 - Legal & unexpected: 50 000 €
 - Operating Costs (about 270 000 €)
 - Salaries: 120 000 €
 - Marketing: 60 000 €
 - Admin + support: 90 000 €
 - Total Funding Needed: 570 000 €
 - Sources: Investors, EU grants, local partnerships
-

Financial Strategy 2/2

Months 1–6: Setup

- Enter Poland & Czechia
- Hire 2–3 local team members
- Localize product & integrate with EHRs
- Start basic marketing

Months 7–12: Pilots & Feedback

- Run pilots in clinics
- Collect user feedback
- Improve product
- Test pricing models

Months 13–18: Scale

- Build EHR partnerships
- Apply for EU funding
- Expand sales efforts
- Track user data

Months 19–24: Prepare for More

- Evaluate results
 - Plan entry to Romania/Slovakia
 - Hire regional lead
 - Improve systems
 - Create customer case studies
-

Internal Development Strategy

Internal Development Strategy

Based on the internal development analysis, the main development areas are:

- **Addressing competency gaps**
 - competency mapping for current and future roles, 12-24 month hiring plan
 - **Formalising operations**
 - internal workflow documentation, implementing feedback loops between sales and product teams
 - **Resource allocation and role clarity for scaling**
 - scalable resourcing plan to align with the go-to-market plan, quarterly planning to assess workload distribution and resourcing
-

Competence

YEAR 1 Hiring regional managers for Poland and Czechia

YEAR 2 Peer-mentoring across markets

YEAR 3 Formalising internal role mobility paths

Operations

Documentation of core processes

Addressing the scalability of CRM

Refining SOPs to reduce friction in expanding to new markets

Resources

Defining clear roles and allocating initial resources

Middle management roles for new markets

Designing a resource allocation model to support markets based on traction, funding, and strategic prio

Thank you!
